*When the SAT was renamed in April 1995, mean scores were set at or near the midpoint of 500 of the 200–800 score scale, a process called recentering. All scores in this table reflect that process. Means after 1996 are recentered, and those for 1996 are based on recentered scores plus scores converted from the original to the new scale. Means for 1987–1995 were recomputed after individual scores were converted from the original to the new scale; means for 1972–1986 were converted to the new scale after a formula was applied to the original mean and standard deviation; and means before 1972 are based on estimates.

**Writing data are based on students who took the current version of the SAT Reasoning Test, first administered in March 2005. Of the 1,465,744 students in this report, 1,376,745 students have scores on the SAT writing section.
